TOP SKILLS

- Cognitive Quantum Intelligence
- Artificial Intelligence Design.
- Global Alpha Corridor Architecture
- GeoEconomic business Architectures
- Liquidation & Cross-Border Settlement
- Venture Enterprise architecture
- Corporate GeoEconomics Architecture
- Sovereign Envoy & Nation-building
- Trade competitiveness Solutions
- National wealth architecture
- Intrinsic Value - Oriented Architecture
- Cross-border economic cooperation
- Multilateral economic risks mitigation
- Private Equity & Alternative Vehicles
- Tokenized funds design
- digital asset - RWA Capsule Strategies
- Structuring PPP, SPV, ETF etc
- Sovereign & Impact Funds
- Intrinsic value & Quantum Network AI
- Quantum Computing

LANGUAGES

- English (Fluent/Native)
- Tamil (Native)

SUMMARY

Maya Suresh Kannan is a globally desired GeoEconomic Cognitive quantum Intelligence Architect. He managed multiple GeoEconomic Scale Alpha Corridor Projects and manages corresponding Funds as a General Partner.

- Regarded as a leading voice on the GeoEconomics of a Digitally Transformed World, Maya helps sovereign governments, investors, and corporations navigate structural geopolitical changes and architect systems that achieve national competitiveness, resilient economic sovereignty, and cross-border value creation.
- As Chief Investment Officer, Fund Manager, and GeoEconomic Command Architect, he operates at the intersection of sovereign capital deployment, deep-tech AI substrates, and crisis-level asset defense. he does not issue reports or predict markets—he engineers the non-traditional corridors through which high-conviction capital remains mobile, autonomous, and immune to host-nation expropriation.

Maya Kannan is the creator of MayaNomics, an advanced framework synthesizing:

- Geo-economic systems design
- Macro-micro trade dynamics
- Multilateral currency and asset flows
- Innovation ecosystems• Digital and intrinsic-value asset architectures
- Impact + Value investment models

Maya Kannan is the Inventor of karmaCapsuleNetwork(reinforced CapsNet), a Cognitive Quantum Network AI system. Maya utilizes a systems-level approach, integrating global economic intelligence with geopolitical forecasting and capital market structures.

- His expertise includes AI-driven value modelling, wealth reconstruction, deep-tech commercialization, and multilateral trade corridors.
- He revolutionizes the way businesses develop and exchange digital assets with inherent values.
- He spearheaded the incorporation of quantum algorithms into current AI models.
- Maya led AI-driven, cross-functional research projects centered on innovation.

Maya Kannan also advises on digital assets, tokenized markets, and national digital transformation strategies. He excels in creating economic blueprints, sovereign investment strategies, and future-ready frameworks for nations and global enterprises. Maya's influence spans across global markets and emerging economies, where he has shaped:

- Cross-border investment ecosystems
- New economic corridors & community aligned models
- Agro & Energy transformation systems
- Private equity fund structures• Sovereign Competitiveness

“ Maya kannan’s advisory uniquely integrates Systems, Geo-Economic Forecasting, Investment strategies, and Innovation. This blend positions him as a top-tier candidate for Large Scale Infrastructure Projects Funds Management, advisory boards, policy councils, investment committees, Innovation Councils, and Economic bodies. “

EXPERIENCE

mayaNomics Goeconomics Forum - <https://www.mayanomics.org>

Chief Convenor

2025 - Present

This esteemed goeconomics forum stands as a premier platform for transformative discussions, knowledge expansion, and the development of innovative frameworks and strategies focused on Value and Impact investments that are poised to reshape our world. By empowering investors, entrepreneurs, CXOs, financial managers, diplomats, and policymakers, it equips them to adeptly navigate the dynamic goeconomics landscape and seize its abundant opportunities with confidence. As part of this Global Platform for Geo-Economic Intelligence & Innovation Policy, Maya Leads one of the few global forums dedicated to the future of goeconomics, multilateral currencies, and intrinsic value systems and Shapes discourse for investors, policymakers, diplomats, and global CXOs.

mayaNess Cognitive Quantum Society - <https://www.mayaness.org>

Chair

2025 - Present

The contemporary marketplace is facing a quiet crisis. Autonomous systems are entering the enterprise landscape without the maturity, mechanisms, or structural philosophy required to protect human agency. A true control system relies on a clean feedback loop to optimise outputs and drive sustainable progress. Today, that loop is broken. mayaNess is a Society of Cognitive Quantum Intelligence covering - Cognitive Command, Synchronicity and Sovereignty- built Primarily for capital principals, sovereign builders, and executive minds who refuse to let automated consensus flatten their edge. A Society Born at the Edge of Science and Spirit In an era defined by artificial intelligence, geopolitical fracture, and economic disruption, mayaNess emerges as the world's first Society for Cognitive Command.

Valiant Telos - [https:// www.valianttelos.com](https://www.valianttelos.com)

2024 - Present

Chief Investment Officer & GeoEconomic Cognitive Command Architect

Valiant Telos is An Elite Goeconomics and Cognitive Command Unit for Driving the Alpha. A Principal Command Unit synthesizing Goeconomic Intelligence and Cognitive Synchronicity for Precision Capital Deployment. It specializes in Alpha Engineering—re-architecting assets to remove jurisdictional friction—and Fund Management, where it mobilizes synthesized value through our proprietary Alpha Corridors. It doesn’t just find alpha; we architect it for structural supremacy.

The Three Pillars of Maya Kannan’s Engagement: Tensor Intelligence: Decoding the 9-characteristic goeconomic field, Structural Synthesis: Hardening assets and venture DNA for market autonomy and investor security(The Forge) and Capital Deployment: Direct Placement of high-conviction investment into synthesized, Alpha corridor-ready assets.

As Chief Investment Officer and Goeconomic Architect, he leverages expertise in Cognitive Command, global policies and geopolitical dynamics to foster resilient trade and business ecosystems and promote sustainable growth.

- Maya Sets macro-aligned investment strategies across AI, digital assets, climate tech, and emerging markets.
- He designs intrinsic-value-driven investment mandates for HNIs, family offices, and private equity. Develops frameworks for modern asset liquidity, digital valuation, and multilateral settlement
- Blends the Alternative Investments and Sovereign Funds as a secret sauce for building wealth for corporates, families, institutions and sovereigns.
- Advised on economic transformation and industrial strategy. Developed frameworks for North American expansion of global startups and led economic intelligence programs integrating policy, trade, and capital alignment.
- Conducts Regular ground-level research from various economic regions, nations and states to Access global Private assets and IPs

“ Maya Kannan is an expert in enhancing investment portfolios and large-scale programs, offering clients strategic clarity and transformative economic impact. His blend of financial insight and program leadership enables him to design initiatives that boost economic resilience, accelerate ROI, and foster sustainable growth. etitive advantage. “

digiBlitz Holdings | Quantum Cognitive AI & Sovereign Substrates

Founder & Chief Arcitect

2001 - Present

Since 2001, DigiBlitz has engineered the intersection of technology, enterprise, and market innovation. digiBlitz Holdings | Quantum Cognitive AI & Sovereign Substrates. As a Cognitive AI digital Asset Holding Company, we bridge the gap between physical value and digital governance by creating private, AI-driven avatars for Real World Assets—transforming static holdings into intelligent, secure, and liquid instruments of the new geoeconomic era. DigiBlitz has evolved from a quarter-century foundation in enterprise technology into a specialized Cognitive AI digital Asset Holding Company. We bridge the gap between physical value and digital governance by creating private, AI-driven avatars for Real World Assets.

As a Chief Innovation Officer, I direct the quantum-cognitive architecture, mathematical design, and global implementation of the entire KCN product stack. I engineer the underlying cryptographic and tensor machinery that allows sovereign entities, family offices, and enterprise networks to execute zero-lag cognitive processing, tokenize complex asset classes, and structurally insulate their data against Harvest-Now-Decrypt-Later (HNDL) threats and G7 jurisdictional overreach.

QUANTUM-COGNITIVE SUBSTRATE ARCHITECTURE (THE KCN SUITE)

Architected and deployed the proprietary four-layer KCN stack (Ethereal, Astral, Mental, Cosmic), translating complex geoeconomic requirements into post-quantum software products:

🌀 KCN CosmicQuantum™ Core: Engineered the cognitive orchestrator routing workloads across QPUs/GPUs under ML-KEM-1024 & ML-DSA-87 (NIST FIPS 203/204) post-quantum cryptography.

🛡️ NodeShield™ & QuantumTunnel™: Built automated pipelines securing data-in-motion against quantum decryption, replacing legacy RSA/ECC with lattice cryptography.

⚖️ SovereignGate™ Cloud: Architected a multi-tenant cloud automating AI/data compliance via format-preserving PII masking, bias scrubbing, and ledger provenance.

🌐 KCN Asset Orchestrator: Constructed a quantum-safe interface eliminating cross-border Decision-Lag via high-dimensional vector routing across global assets.

karmaCapsule Cognitive AI

2021 - Present

Chief Innovation Officer

Karma Capsule Cognitive Quantum AI is a private and Consortium network system involved in providing a robust cognitive AI system for Trade and Investment Corridors, enabling them to handle resilient supply chains, digital assets, decentralized financing, tokenization, liquidity, and settlements. Frameworks without technological execution are merely theory. The karmaCapsule Network (KCN) is the deep-tech, post-quantum substrate invented by Maya Suresh Kannan that operationalizes mayaNomics™ and mayaNess™ at scale. KCN shifts the paradigm from passive "Data-as-a-Service" to active "Outcome-as-a-Substrate" — embedding sovereign intelligence directly into the data layer. Hardened against HNDL adversarial threats using NIST FIPS 203/204 lattice standards. As a Chief Innovation Officer, Maya has Been deploying the Karma Capsule Network and MayaNomics GeoEconomic Framework, along with corresponding business models, which are used as strategic drivers for creating champion organizations out of startups.

“ Clients choose Maya Kannan for his unique ability to transform investment strategies into significant economic results, enhancing both institutional performance and national competitiveness. He is the strategic leader for Private Equity, Sovereign Funds, and high-impact global programs, consistently turning complex challenges into measurable successes. “

agroKarma & energyKarma - Special Purpose Vehicle / PPP

Chief Adviser & Promoter

2021 - Present

Decentralized Agro Trade Seed to Store.

agroKarma creates systemic liberty in agro trade — empowering farmers with free markets, fair pricing, and blockchain-powered supply chains that eliminate exploitation. agroKarma is a decentralized agro-trading platform that tokenizes agricultural outputs as digital assets on the Karma Capsule Network — a blockchain-powered supply chain that connects farmers directly to traders, FMCG companies, financial institutions, and global markets. By eliminating traditional middlemen and price-fixing cartels, agroKarma restores the farmer's rightful place at the centre of the agro economy — with full transparency, trustless payment settlements, and the freedom to trade without barriers.

- Architect of rural economic modernization and agri ecosystems.
- Blue Economy projects across the Caribbean.
- Investing and Managing EuAfCa - Europe-Africa-Caribbean Corridor Projects.
- Negotiate, Liaison, design and execute SPVs and PPPs globally.
- Performed the role of an Envoy for the geoEconomic impact agro investments.

energyKarma - Special Purpose Vehicle / PPP

Chief Adviser & Promoter

energyKarma was established with a simple but powerful premise: the communities that have contributed least to climate change are suffering its consequences most — and they deserve access to the clean energy solutions that can transform their futures. Headquartered in Sheridan, Wyoming, we operate a growing portfolio of renewable energy projects spanning solar, wind, green hydrogen, and waste-to-energy across Namibia, Botswana, Angola, Trinidad & Tobago, Barbados, India, New Zealand, Canada, the USA, and the UK.

Our approach is built on deep local partnerships, rigorous project development, and a commitment to leaving every community better than we found it. That's the karma of clean energy — it compounds.

- As a Transnational Trade & Policy Strategic Advisor, Guided creation of transnational value chains, cross-border trade, and green energy strategy.
- Investing and Managing EuAfCa - Europe-Africa-Caribbean Corridor Projects.
- Negotiate, Liaison, design and execute SPVs and PPPs globally.
- Performed the role of an Envoy for the geoEconomic energy investments.

Systems Design Consultant for Verizon, British Telecom & Nortel

1996 - 2002

- Developed Software Architecture and provided consulting services in J2EE/EAI.
- EAI, Software Solutions Design/Development, Integration Architecture, Solutions Architecture
- Distributed computing and middleware development(DCE-RPC)
- Developed various systems using C, C++ and VC++ Languages

EDUCATION

- Strategy & Management Courses-MBA (2014), Western Governors University
- B.E., Electronics and Telecommunication · (1992 - 1996), University of Madras
- Law Courses (2010 - 2013), Sri Venkateswara University
- Certification, Enterprise Architecture- FEAF, DODAF · (2007 - 2007) FEAC Institute
- Diploma in Advanced Computing - CDAC, Govt of India.
- Ice cream Short Course · (2015 - 2015), Penn State University
- TOGAF 8.1
